COMMITTEE DOCUMENT CONTROL

**DOCKET NO. L-00000BB01-0118**

IN THE MATTER OF BOWIE POWER STATION LLC'S APPLICATION FOR  
CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY.

To the Arizona Corporation Commission:

I Wayne Bryant, with this letter intervene, and request party status in the above captioned proceeding. My purpose is to help protect the environment and the socio-economic fabric of our communities in Southern Arizona. Promote orderly development and to represent worker and consumer interests as an individual.

My concerns include, but are not limited to, the environmental impacts from the power plants air emitting PM's, and will the latest use of BACT be required? The environmental and economic impacts of the plants groundwater use, or will the latest air-cooled technologies be required? The negative socio-economic impacts caused by the potential importation of hundreds of out-of-state workers. For example, we are currently experiencing these impacts with Houston based, Reliant Energy's use of Zackery Construction Company. building power plants in Casa Grande and Kingman. Now Reliant wants to expand its facilities in Casa Grande. The Construction Company (TIC) is another Construction Company. being used by APS and SRP that also has built Power Plants in Tucson, Red Rock and currently Phoenix. With all the new power plants currently being constructed across the state the question needs to be asked how much is enough for Arizona's needs?

The citizens in Gilbert AZ. are currently at odds with SPR's SanTan expansion approval over air pollution (PM-10) and are possibly looking at legal action. APS's 43<sup>rd</sup> Ave West Phoenix Expansion Project (after legal action) must provide HEPA-FILTERS and training for the surrounding residents at a cost of \$50,000.

This same LLC, Southwestern Power Group LLC appears to be the parent company to both the Bowie Power Station LLC. and the Toltec Power Station which is currently experiencing concerns from local residents of the surrounding community's of Arizona City to Marana.

Needless to say this is just the beginning of causes and effects. The ACC needs to become aware of its accumulative actions and the hearing process is our first step for awareness.

Thank you,

Wayne Bryant

Arizona Corporation Commission
